Data Discovery & Profiling

Data Discovery & Profiling

- › Understand your data and discover paths to improvement

High data quality is the bottom line of success for any organization, and data discovery and profiling is the first step in any data project.

Uncover problems in your data from incorrect or missing values to duplicates and more. Knowledge of the state of your data quality empowers data users to make smarter, more informed decisions, and prevent costly mistakes.

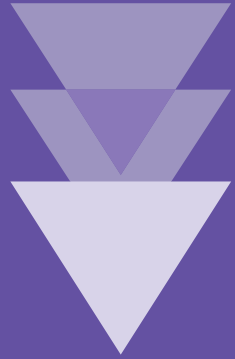

Data Profiling

Metadata Discovery & Definition

Text Analytics & Unstructured Data Discovery

Data Catalog & Business Glossary

Data Catalog & Business Glossary

- › Access and leverage metadata for future projects

Keep track of your insights with the Ataccama ONE Data Catalog & Business Glossary. Acting as central storage for all metadata ever discovered or created in the Ataccama ONE platform, the Data Catalog stores your insights automatically. Improve and enhance metadata, collaborate with other users, and leverage those findings for future projects.

Manage business terms in your organization in the Business Glossary and automatically map them to existing data sources in the Data Catalog, keeping both synced and up-to-date.

CUSTOMER SUCCESS STORIES

Data Integration & Synchronization

Big Data Processing & Data Integration

Big Data Processing & Data Integration

› Discover and manage assets in your data lake

Quickly understand and explore data in your data lake, rapidly process and integrate enormous volumes of data, and conduct a detailed data quality analysis before executing necessary transformations.

Ensure data is ready for further analytics at the right place and time, and in the right format.
